Bodytone is the brand for fitness professionals that's available to anyone who wants to work out and take care of themselves in the gym or at home.

Bodytone's primary goal is to improve people's health and happiness by making exercise accessible and fun.

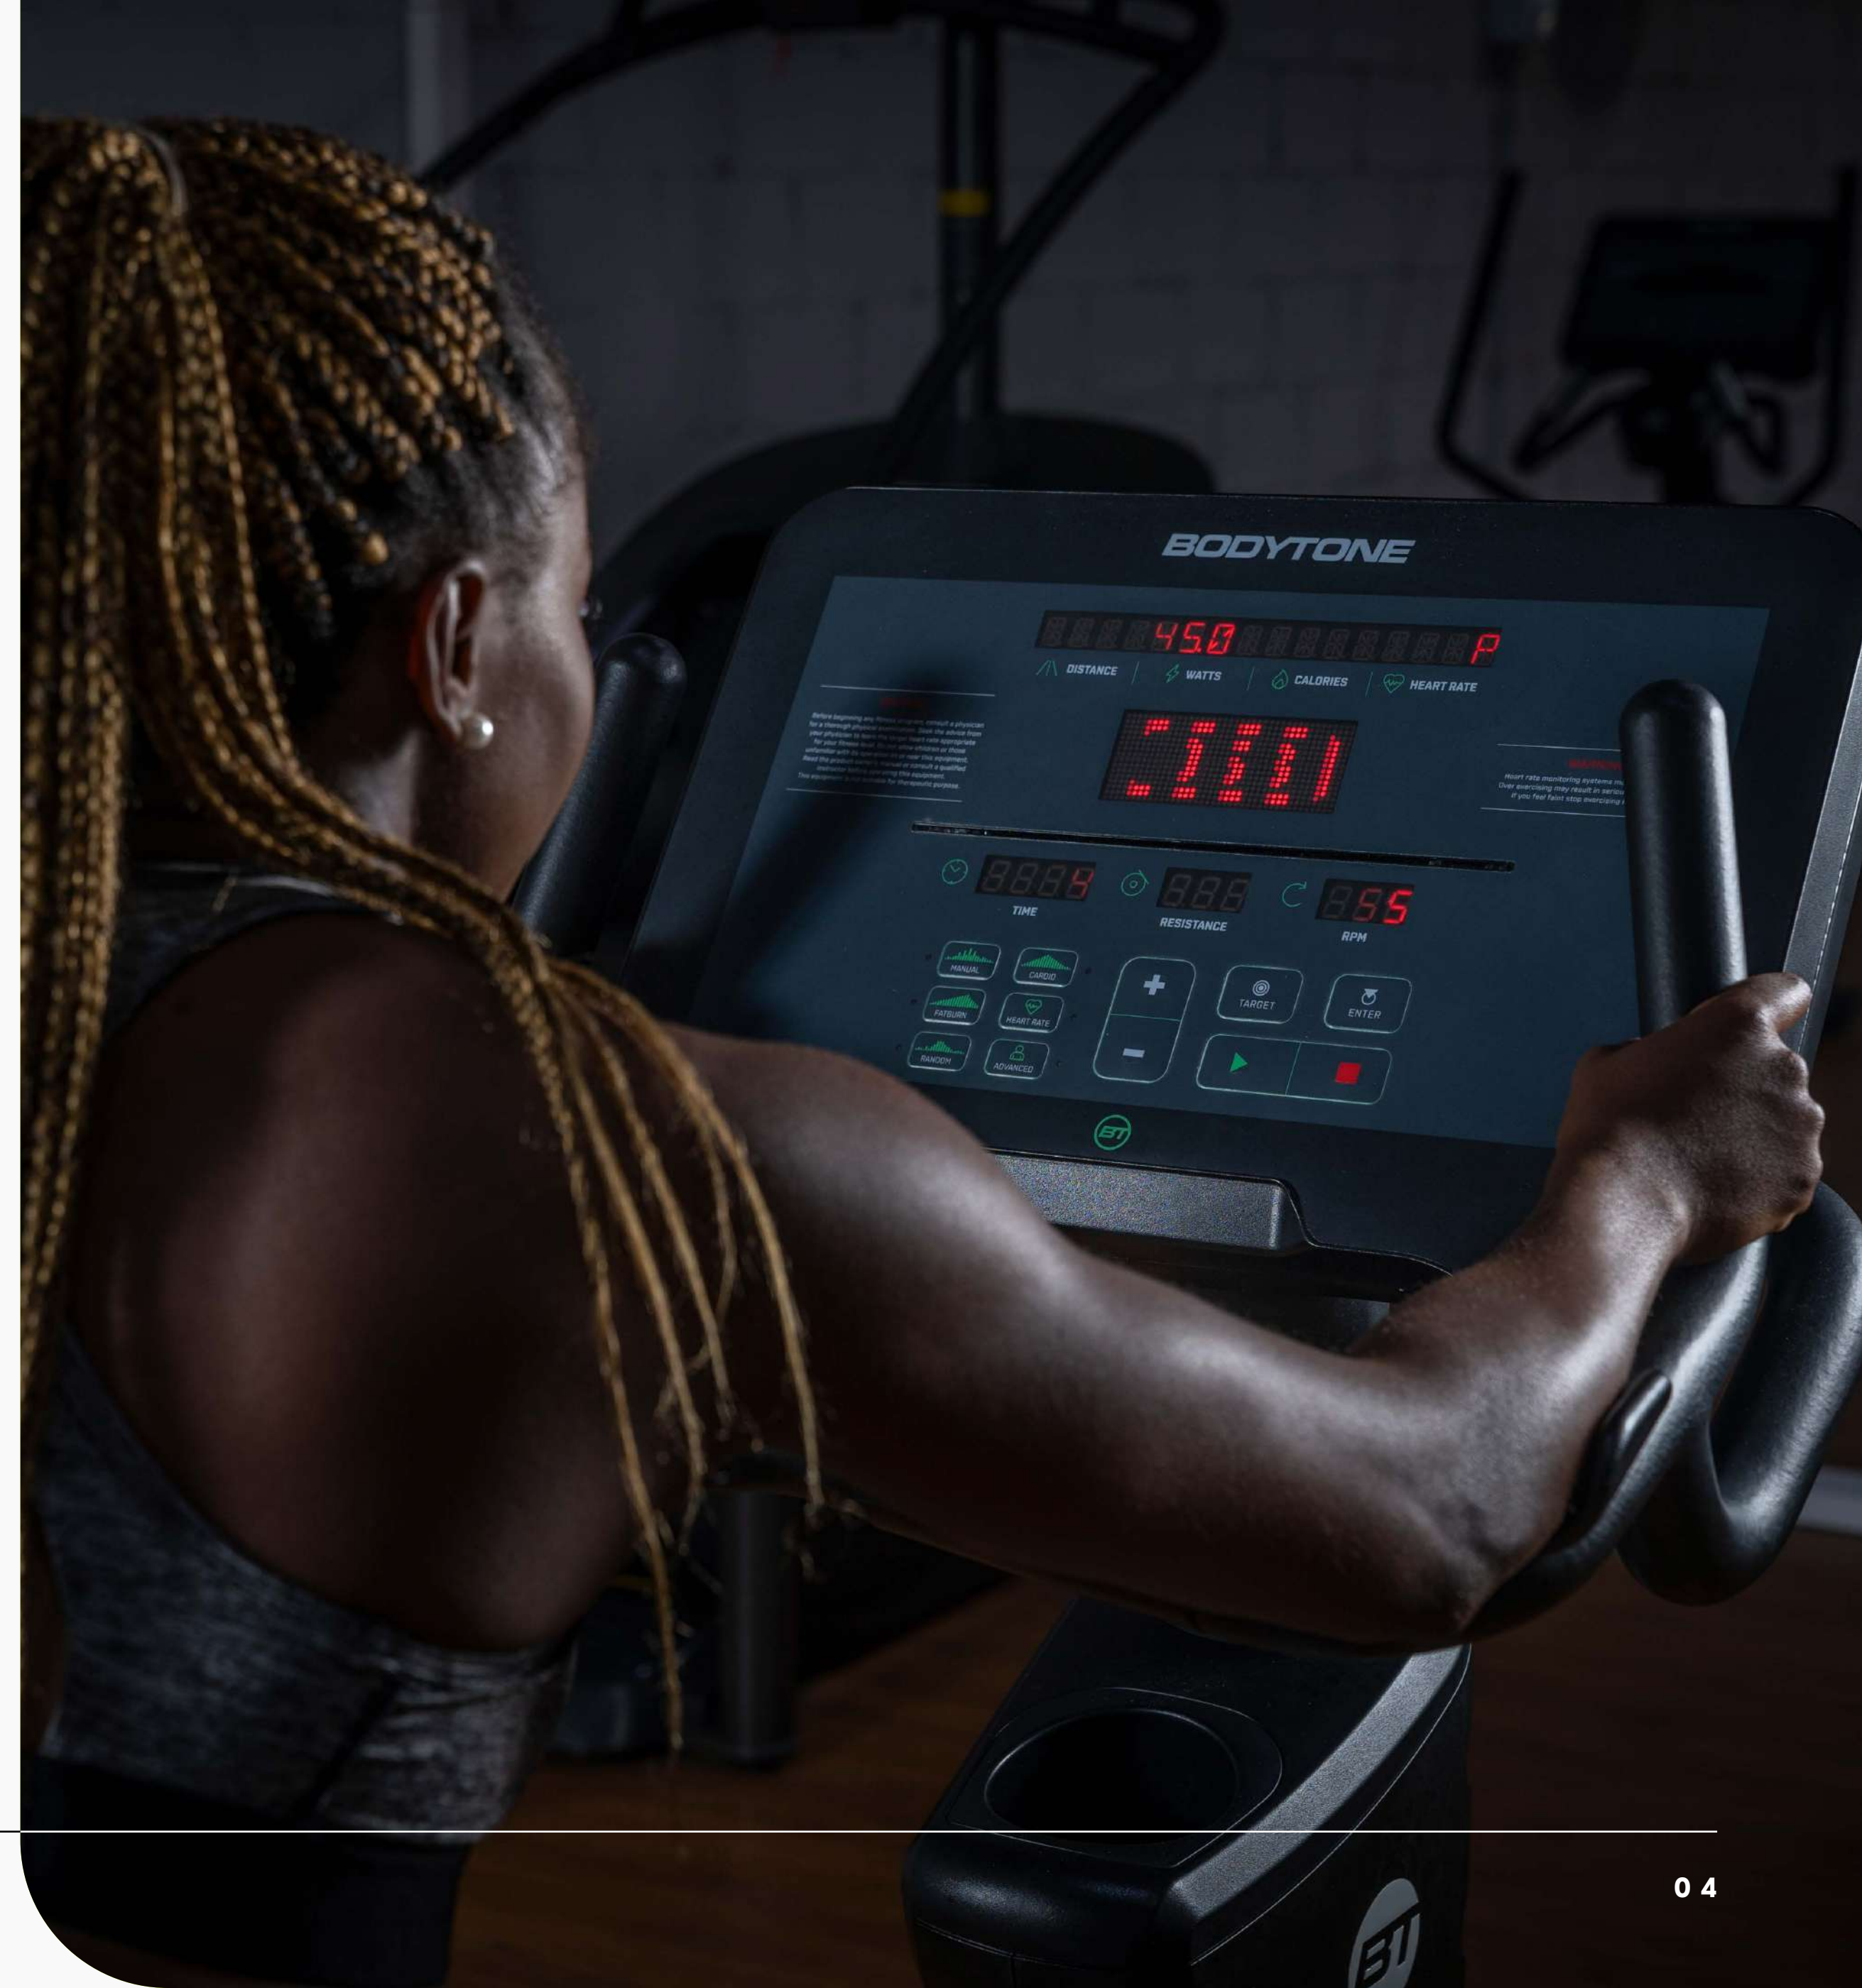

**Move.
Live.
Enjoy.**

Our passion for sport helps us see things from our customers' point of view. Since the creation of Bodytone, we have worked hand in hand with fitness professionals, listening to their needs and creating products and solutions that improve their sports centers, the experience of their clients and the profitability of their business.

Bodytone equips both large gym chains and independent centers, responding reliably to the highest levels of demand. Likewise, hotels, residential complexes, universities, corporate spaces and clinics trust us.

We design technologically advanced and connected products that are interactive and can track workouts to take the home gym experience to the next level.

The key to Bodytone is to help professionals boost their business:

**TAILOR-MADE
FINANCING**

**CUSTOMER SERVICE AND
UNIQUE GUARANTEES**

**PROFITABILITY FOR
THEIR BUSINESS**

CREATIVE PROCESS: **HIGH-LEVEL DESIGNS**

Bodytone's design team works every day to create world-class equipment through a successful formula that integrates research centres, professionals and users.

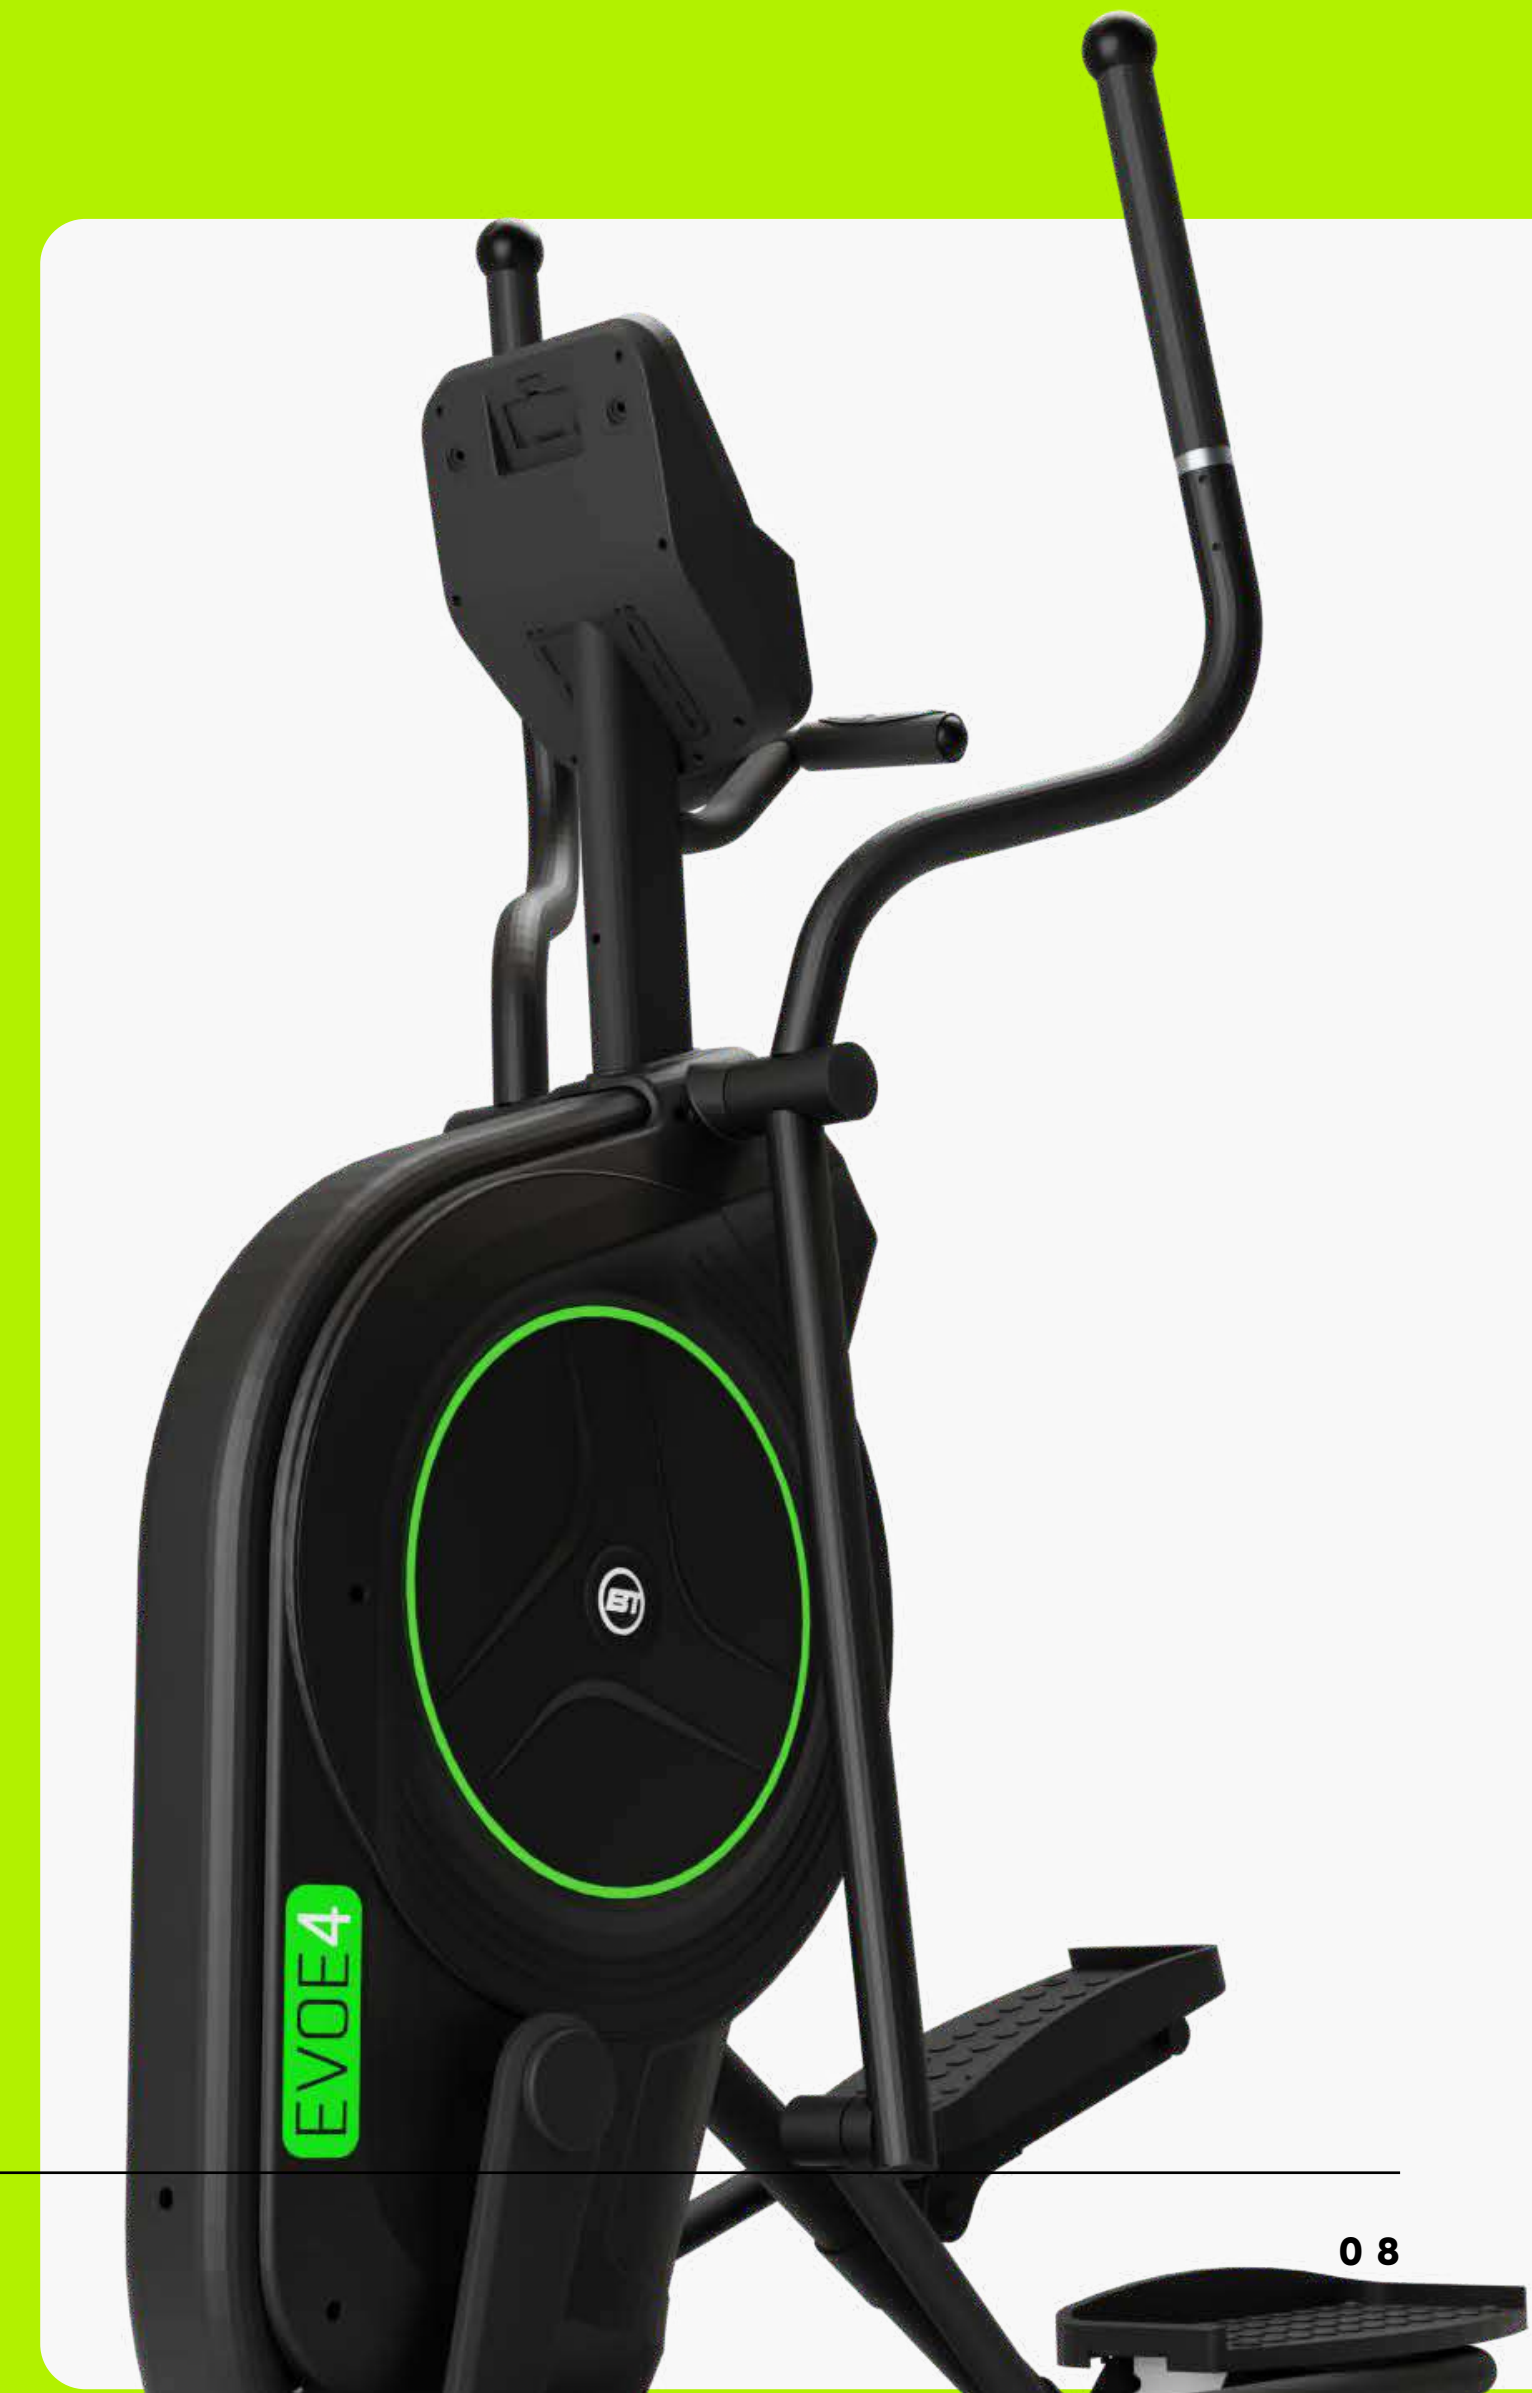

Bodytone has collaboration agreements with relevant research centers around sports and biomechanics from prestigious universities such as the University of Valencia or the Catholic University of Murcia in order to take its products to a higher level in order to provide the maximum experience to the users.

We equip both large gym chains and independent centers, responding with solvency to the highest levels of demand. Likewise, hotels, residential complexes, universities, corporate spaces and clinics also trust us.

TEAM

Team is a line of products, great for any type of space, to encourage people to do sport.

The design of these machines has been thought out to ensure that they have greater durability and offer a better service than the domestic line. For this reason they are fantastic for gyms, located in a community of neighbours or in hotels, even for those individuals, who are particularly ambitious, with their own private gyms.

TEAM

TEAM RUN

The EVOT4 is a semi-professional treadmill designed to enjoy practicing sports. It has an attractive and elegant structure, which fits perfectly in any space.

Thanks to built-in REACT® technology, the platform reduces joint stress by cushioning the impact of each stride, and its unique orthopedic strap is made from a dense, grippy material for total comfort and stability during your run.

It was designed to provide the best running experience, maintaining a unique, exclusive and durable design. Therefore, it is the ideal solution for all hotels, fitness clubs and spas that wish to offer a unique experience to your clients.

MOUNTED DIMENSIONS
203x91x153cm

MAX. USER WEIGHT
180 kg

ENGINE PEAK
4.0 HP AC

HANDLEBAR HR SENSOR
Yes

INCLINE
Up to 15%.

SPEED
20 km/h

RUNNING SURFACE
145x55 cm

CUSHIONING SYSTEM
REACT® cushioning technology:
it adapts to each type of stride.

TEAM CYCLE

The Bodytone EVOU4 semi-professional exercise bike brings home the best cycling experience in the world.

This bike uses the same engineering as our professional exercise bikes. It has electronic regulation, heart rate sensors, 13 predefined training programs and an inertial mass of 16kg, among others.

In addition, the EVOU4 uses high quality materials, has a robust structure and was designed to adapt to the needs of any type of client, making it a great product for those hotels, fitness clubs or spas that wish to offer quality products to your clients.

MOUNTED DIMENSIONS

147x53x113cm

TEAM CYCLER

The EVOR4 is a semi-pro stationary bike engineered from our pro stationary bikes. It has the characteristics: electronic regulation, electromagnetic and an inertial mass of 16 kg. The only difference is that this model is reclining, its seat is closer to the ground and surrounds the lower back, making it ideal for people with back problems, since the weight of the body falls on the lower body and not on the upper body.

The quality and performance of this bicycle fully meet the needs of the professional Wellness sector and make it an ideal product for use in hotels, fitness clubs and spas.

TEAM ELLIPTICAL

The EVOE4 is a semi-professional elliptical cross trainer, valid for both domestic and professional use.

These types of machines are highly recommended, since you can perform a total movement of the body without impacting the ground. So you can perform high-intensity training, with a perception of minimal fatigue, without forcing your joints and above all without disturbing your neighbors, since it is so quiet that you can use it even at night.

This elliptical cross trainer for professionals with electromagnetic regulation and 16kg of inertial mass maintains an attractive and elegant structure, making it the ideal solution for all hotels, fitness clubs and spas that want to offer a unique experience to their customers.
